

Crypto Wallet

Simple, elegant, and secure platform to build your crypto portfolio. Buying, selling, and storing your crypto has never been easier. Do your crypto transaction with ease

Idea

The global crypto market is increasing day by day.

While investors are riding the waves of this global phenomenon, they often encounter issues with their wallet service provider since most of them take up high transaction charges.

We accept fiat money for respective cryptocurrencies with low transaction fees compared to other service providers.

MangoDB

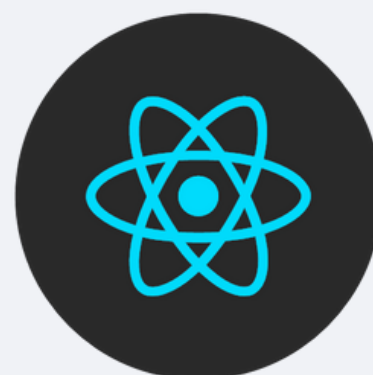

Document-oriented database program

Express

Back end web application framework for Node.js

Technical stack

React

JavaScript library for building user interfaces

Nodejs

Back-end JavaScript runtime environment

Problem

Faced by crypto users
